<sup>1</sup>The U.S. Fish and Wildlife Service's 2002 List of Birds of Conservation Concern (BCC) identifies those migratory and non-migratory avian species that, without additional conservation actions, are likely to become candidates for listing under the Endangered Species Act of 1973 (ESA)(16 United States Code [U.S.C.] 1513–1543).

<sup>2</sup>Partners in Flight (PIF) Priority Species are recognized by Utah Partners in Flight as birds most in need of conservation. Management issues, conservation recommendations, and suggestions for research and educational outreach are described for these species in the Utah Partners in Flight Avian Conservation Strategy.
